Trachelospermum jasminoides	Star Jasmine	3m – Fragrant white flowers		

All application forms must be submitted to Council at least three (3) weeks prior to the collection date in March and September.

Free trees/shrubs in 150mL pots can be collected from the Council Works Depot on Old Maitland Road, Cessnock on the first Friday in March and September between the hours of 8.00am and 3.30pm.

Any enquires regarding the application for supply of trees and shrubs should be directed to Councils Open Space Operations Coordinator on 4993 4306.

This form should be returned to Council when completed via one of the following:

POST:	PO Box 152 CESSNOCK 2325
IN PERSON:	Cessnock City Council 67 – 78 Vincent Street CESSNOCK 2325
FAX:	02 4993 2505
EMAIL:	council@cessnock.nsw.gov.au

The value of trees in a sustainable world is beyond measure:

Economic Benefits:

Property values are increased by the presence of trees by creating a 'leafy suburb'. In rural areas trees shelter stock and stabilise soil. Trees also save money in home heating and cooling costs if planted effectively.

Social/Cultural Benefits:

Visually, trees make an important contribution to the character and amenity of the local area by forming a significant vista in the landscape. Trees improve our quality of life by providing a sense of peacefulness, restfulness, serenity and tranquillity as a result of creating a more natural and less artificial environment.

Environmental Benefits:

Trees purify the air, screen objectionable views, soften the built environment, and create a habitat for birds and other wildlife. They can also reduce glare from street lamps and car headlights, modify the wind and reduce the damaging effect of strong gales. Some have a cooling effect in summer by reducing the amount of heat radiated from surfaces if planted effectively.
